CUSTOMIZED KITCHEN

Each element is produced to maximise the use of the available space and, at the same time, to obtain the best possible personalised design. The JC Kitchens are all distinguished by a bridge element whose form calls to mind the traditional hearth (fireplace) and transforms it into a characterising structure representing the starting point for the realisation of the JC kitchen project in which the most technologically advanced instruments for food preparation find their place. All the kitchens are manufactured with the most highly evolved materials: the structures are in marine multi-layer, well suited for humid settings, the paints are all of the latest generation, resistant to wear and humidity. The technological devices from the most prestigious brands (Gaggenau-Bosch-Miele-Liebherr-Smeg) may be bought by the client directly or purchased with the kitchen.

The background of the entire page is a repeating pattern of antique-style wallpaper. The pattern features large, detailed floral motifs, including tulips and other flowers, intertwined with scrolling vines and leaves. The color palette is muted, consisting of various shades of olive green, beige, and cream.

ANTIQUE - STYLE KITCHEN

The kitchens in the JC Kitchen collection have been designed following the stylistic features of the collection of dining room pieces in the collection of the same name in JC Luxurious Furniture.

This prestigious collection of kitchens has been designed to satisfy the demands of clients who cannot find on the market a product for their kitchen to match the rooms furnished with the classical collections of JC Luxurious Furniture.

All the kitchens are made in a neo-classical style combining decorative elements of varying inspiration: from Empire style to Louis XVI. These kitchens are consequently not realised with standard, modular pieces, rather each piece is made individually one at a time on the basis of a unique, personalised kitchen project.
