Miele Signature  
My personal handle

# Individual.

Customization has always been a key topic at Miele. We strive to find individual solutions and flexible innovations to ensure that products continuously meet customers' demands and needs.

Generation 6000 appliances have already proved to be groundbreaking. Now, with unique handle designs, giving our appliances the essential finishing touch, the beauty of our products truly shine. With these handles, your appliances and your entire kitchen will receive a personal touch - one in line with your personal expectations.

Discover a whole new range of individual design options; discover "Miele Signature - My personal appliance handle".

# High quality.

**Our handles feature materials that exude quality and durability - their design radiates charisma.**  
Appliance handles with wood, slate, gold or glass - precious materials which are pleasant to the touch - stand for elegance and uniqueness.

Thanks to the different types of materials and their unique properties, our Signature Handles can perfectly complement your kitchen ambiance: discreet or focused, rustic or elegant, classic or modern.

# Noble.

Gold, the most precious metal, stands like no other material for luxury. As a matte surface finish on aluminium, gold gives the appliance handle character and exclusivity. And last but not least, the handle mounting complements the color of the appliance perfectly.

**GOLD**

# Unique.

**Individually engraved appliance handles give your kitchen its own unparalleled personal character.** For even more individuality, Miele offers an engraving option on our gold, Clean Touch Steel™ and aluminum handles, exclusively for the project business. Miele is the only manufacturer to offer such a unique option.

UNIQUE

# Natural.

**Slate and wood - natural extravagance:** the handles with inserts from the world of nature are designed to match perfectly and are in pleasant harmony with the colors of Miele's Generation 6000 assortment.

The following models are available to match the colors of our appliances: chrome handle with weathered wood insert and Brilliant White handle mountings, Clean Touch Steel™ handle with slate insert and Obsidian Black handle mountings, as well as Clean Touch Steel™ handle with wenge wood insert and Truffle Brown handle mountings.

*NATURE*

# Shiny.

**Glass - in a clean linear design - is pure elegance.** This elegance is underlined by the shiny inserts of the Vitro handles.

The following versions are available and match appliance colors perfectly: chrome handles with Brilliant White glass inserts and handle mountings, Clean Touch Steel™ handles with Obsidian Black glass inserts and handle mountings, as well as Clean Touch Steel™ handles with Truffle Brown glass inserts and handle mountings.

VITRO

# Classic.

**Always a good choice: the powder-coated aluminium handle, perfect for our corresponding front color of appliances.** Classic and discreet, unobtrusive and restrained, it emanates a sense of understatement.

Brilliant White, Obsidian Black or Truffle Brown powder-coated aluminium handles with corresponding handle mountings are available to match appliance seamlessly.

CLASSIC

# Combinable.

**The perfect combination is key:** Miele Signature handles were designed to match Generation 6000 PureLine appliance fronts with their representative design. The handles underline their perfect design homogeneity and premium appeal, and offer another example of perfection in detail made by Miele. The available combination options and matching handles, inserts and handle mountings emphasise the design character of each appliance

As standard, appliances are shipped with an aluminium, Clean Touch Steel™ or chrome handle depending on the color of the machine front.
