Relax and unwind in a Beautiful Chadder Bathroom

Timeless Elegance

Handsome roll top baths have a timeless appeal, working equally well in a traditional or contemporary setting. But finding and refurbishing period pieces can be a costly and time-consuming challenge, fortunately Martin Chadder has done the legwork for you.

“ The Finest Collection of Luxury Bathroom Fittings ”

Martin has created his own unique range of roll tops using the revolutionary material Chadite. Unlike acrylic, Chadite is a sturdy material based on technology used in the marine industry. Martin created moulds from antique English and French baths allowing his Chadite range to capture the surface patina of the cast iron originals. Unlike the many mass produced baths on the market Chadite baths are durable, comfortable and boast their own individual character.

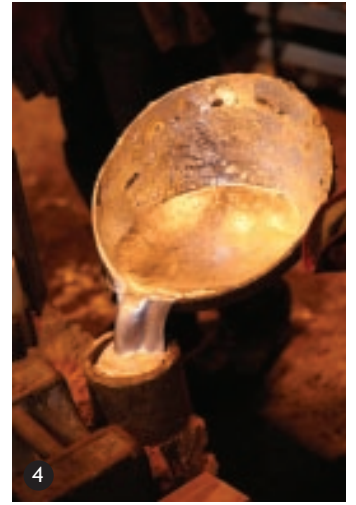

Inspired by the success of his baths Martin developed the Chadder range of complementary cast metal pieces including ornate washstands, mirrors and accessories. He is now recognised as one of Britain’s finest traditional bathroom product designers, famed for both the Chadder range and individually commissioned works.

Right, Blenheim Towel Holder

Cast Metal Products are supplied in the Polished Metal Finish (P.M.)

MADE IN ENGLAND

Sand Casting

All Chadder cast products are hand cast in England using sand-casting skills which have been handed down over many generations.

The dedication of our craftsmen has to be experienced to be believed, and the unique collection of Chadder castings is a fitting tribute to their skills.

First a pattern is placed in a moulding box and special casting sand is packed around the pattern. The mould is then split so both faces of the product have made an impression in the sand.

The pattern is removed and the two halves of the mould put together and lined up.

The metal is heated in a furnace to 700 degrees and then hand poured into the moulding. Special ducts are made in the sand to allow the molten metal to flow through the mould and form the new casting.

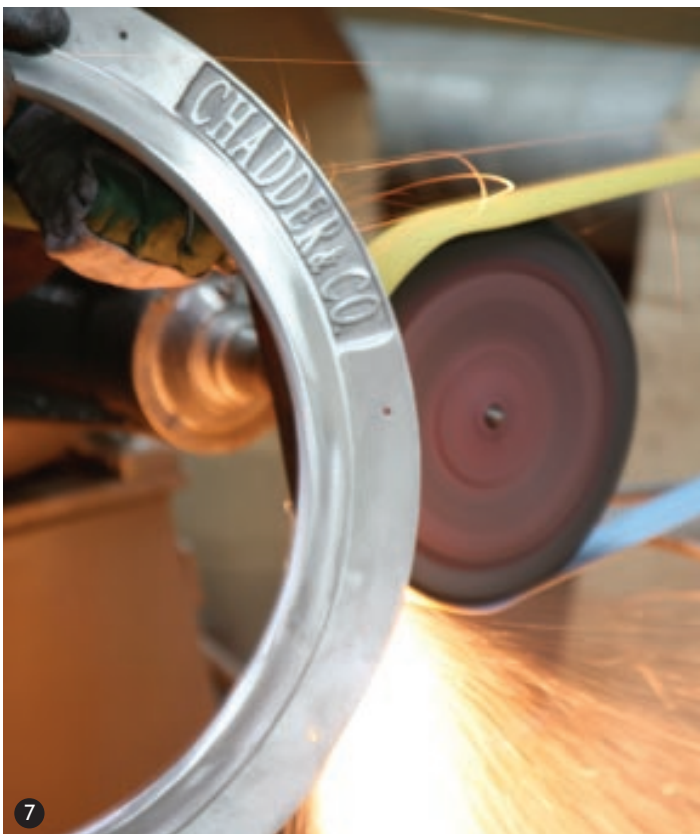

Once the metal has cooled the sand is broken off the mould to reveal the new cast product.

Following the casting the item is then machined and polished giving an antique texture and patina making each item unique.

Please note that all castings may have slight imperfections in colour and texture or small casting marks, this is normal and part of the antique patina of the product.

Chadder cast Metal Products are Hand "Made in England"

- 1 Bars of aluminium
- 2 Sand placed in the mould box
- 3 Weights put on top of the mould to stabilise
- 4 Molten metal hand poured into pattern
- 5 Sand broken off to reveal new casting
- 6 Shelf removed from sand
- 7 Sanding and polishing
- 8 Finished item, polished metal finish

BATHROOM PLANNER

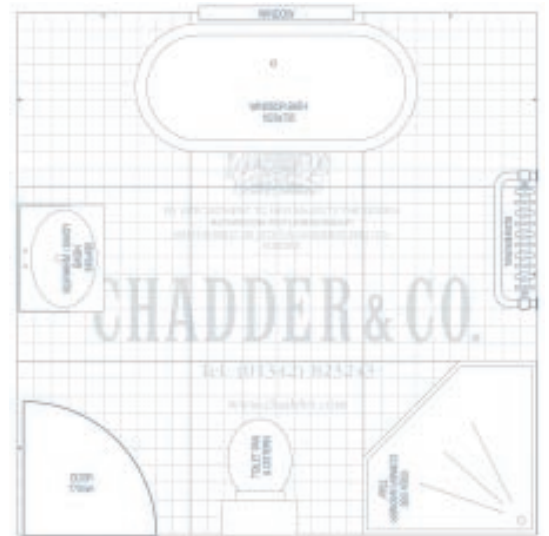

“A little careful planning will ensure the perfect bathroom.”

Perfect Planning

The ideal bathroom is not only somewhere to get clean, it is a sanctuary where you can relax and unwind at the end of a long day, enjoying a drenching shower or grabbing some quality 'me-time' while you soak in the tub.

A little careful planning will ensure that you incorporate all the vital ingredients that make up the perfect bathroom, from bath and basin right down to the finer details such as the mirrors and radiators.

To help take the guess work out of what will and wont fit into the space you have available Chadder & Co. has developed a bathroom planner which you can download from the website www.chadder.com. This allows you to experiment with layout - you may find you have the space for the his and hers twin basin or large free standing bath you always dreamed of.

The Chadder bathroom planner helps you to create the perfect bathroom with the space you have available.

Classic basin on Savoy frame with nickel taps

BATHS

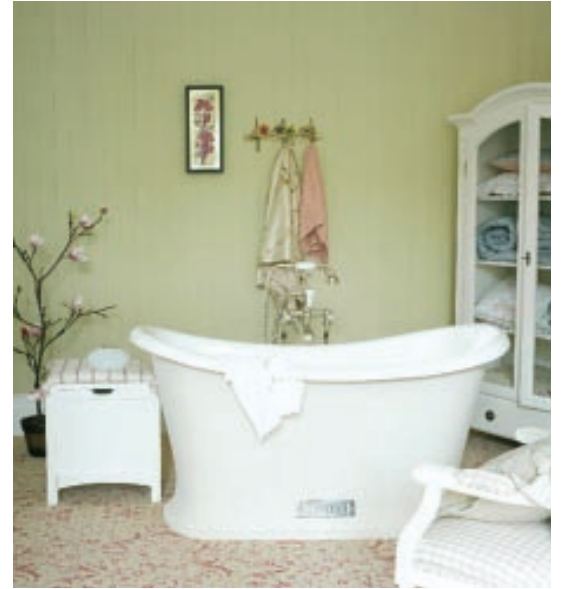

“Before you buy a bath try sitting in it. A bath should not only look good, it should be comfortable too.”

Luxury Baths

A freestanding, roll top bath adds instant flair to any setting and provides the perfect place in which to lie back and relax. The wide range of baths available from Chadder & Co. includes fully refurbished original cast iron models as well as Martin's own Chadite designs. All are beautifully proportioned to accommodate that long, therapeutic soak in the tub.

Choosing Chadite

Using technology from the marine industry Martin developed Chadite a material that has the appearance of cast iron but is lighter and warmer to the touch. Manufactured from Chadite the Blenheim, Churchill, Windsor, and Chariot Baths combine classic good looks with cutting edge technology.

Chariot Bath with painted exterior

A stunning hand crafted Copper Chariot bath with polished nickel interior brought a touch of glamour to this family bathroom

This ivory coloured Churchill bath was installed in a 500 year old Sussex farmhouse

“ Chadite a composite material has the appearance of cast iron, but is lighter and warmer to the touch ”

Blenheim Bath

Made from Chadite the Blenheim Bath is Deep and Luxurious the feet are available Chrome or Nickel Plated or Primed ready for Painting.

(Length 1740mm x 790mm Wide)

Churchill Bath

Made from Chadite, the Churchill Bath sits on its own moulded plinth, it is the same size as the Blenheim Bath, but gives a Simple more Classical look.

Windsor Bath

A Smaller version of the Churchill Bath.

(Length 1620mm x 735mm Wide)

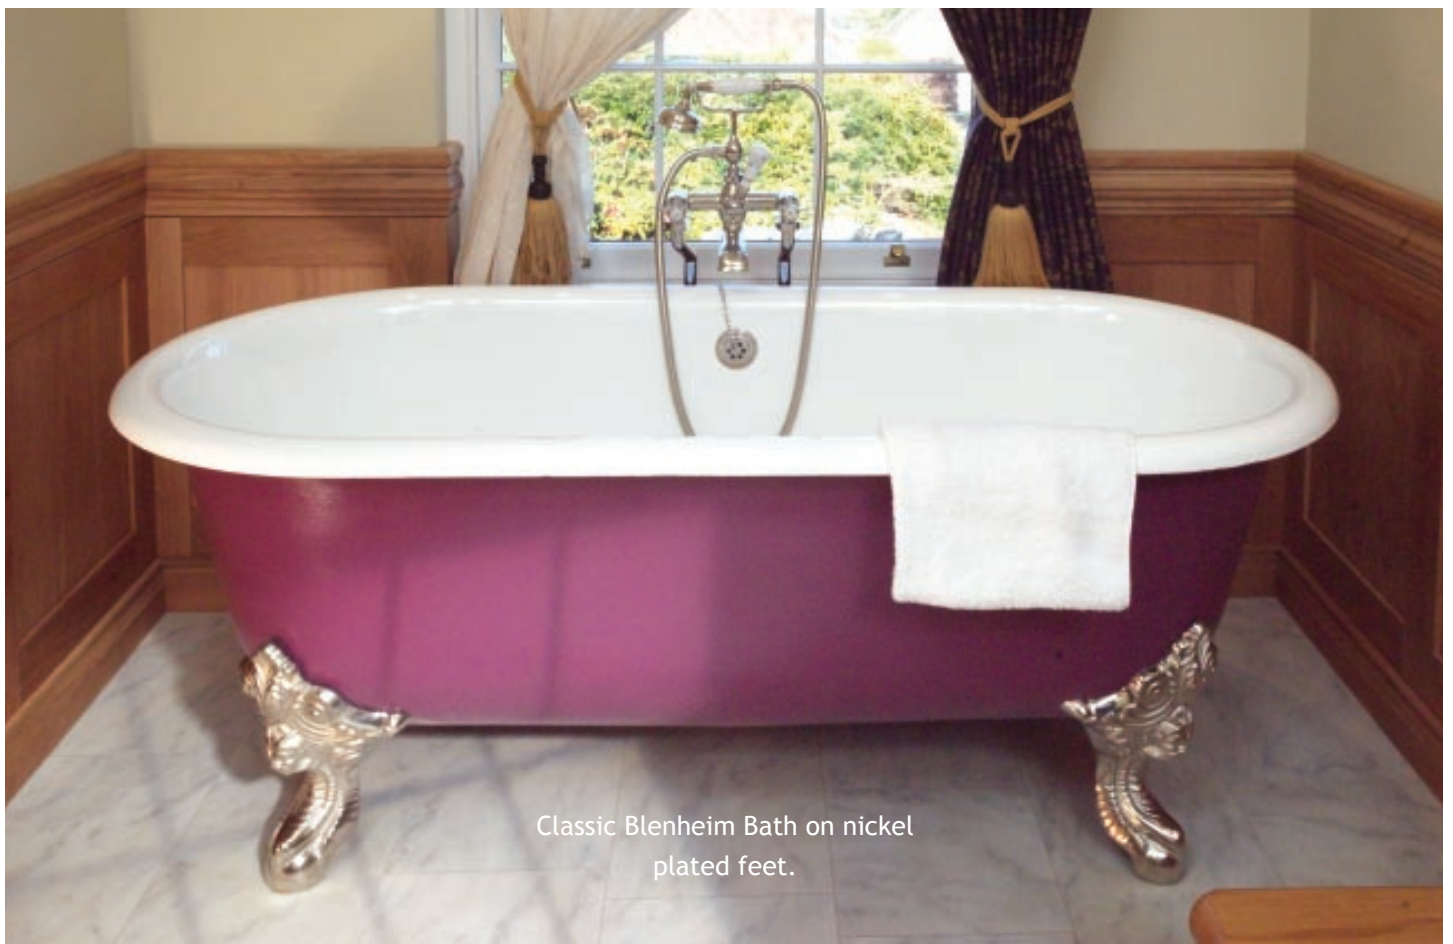

Chariot Bath (over page)

Inspired by the Classic French Bath, this super deep and elegant Bath is available with a primed outside or with a Polished Metal Plinth.

(Length 1580mm x 720mm Wide)

▲Blenheim Foot in primed finish

Classic Blenheim Bath on nickel plated feet.

Chariot bath with polished metal plinth with nickel fittings

BASINS

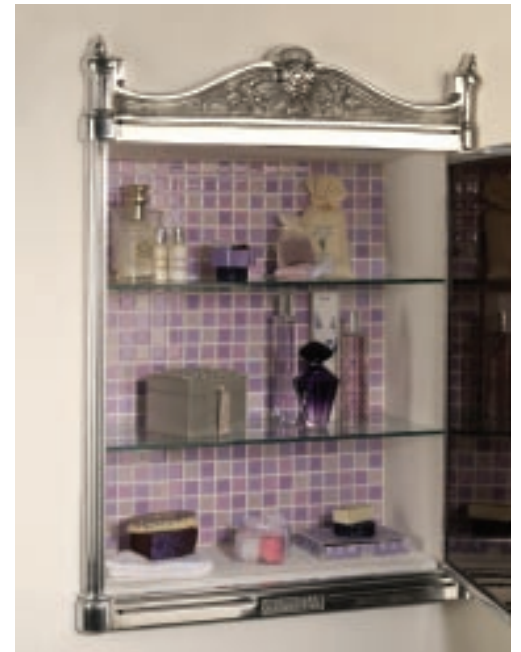

“When choosing basins and taps invest in quality fittings, preferably made in England”

Bathroom or Cloakroom

Based on traditional designs Chadder basins provide a beautiful and practical solution for the bathroom or cloakroom.

His and Her Classic Basins on Churchill Basin Frames with Blenheim in Wall Mirror Cabinets

For use when you have stud work walls the Blenheim Mirror Cabinet gives elegant bathroom storage for any bathroom (glass shelves and in wall backing supplied by customer). When ordering specify hinges on right or left.

“For a Softer Classic look, use Nickel Taps and Fittings”

Martin has cleverly designed the Classic Basin to work with either the Churchill (Left), Blenheim or Savoy polished metal frames. Allowing you to create three very different looks with the same basin.

The Classic Basin size is 640mm Wide x 490mm deep available with 2 or 3 tap holes.

The gloriously ornate Blenheim basin frame deserves to take centre stage in the bathroom

Blenheim basin frame and mirror

Windsor double basin with his and hers
Blenheim surface mounted cabinets.

Following the casting process all Chadder ornate metal washstands are sanded and polished to give an antique texture and appearance. As each piece is hand made, no two are ever exactly the same.

To complement the washstands Martin recommends using his nickel plated taps and fittings.

The Windsor double basin is based on an original French design and manufactured from durable Chadite. The Windsor double basin measures 1415mm wide.

Right: Small Sussex Basin with Polished Brackets/Nickel Taps.

CLASSIC SHOWERS

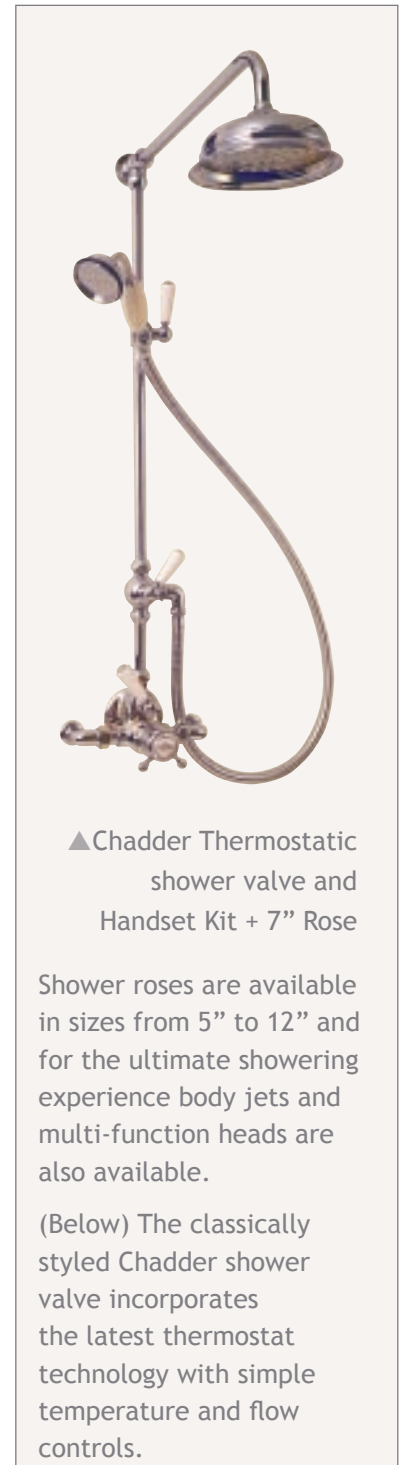

“The Ultimate Showering Experience”

Shower Power

The Chadder & Co. range of taps, showers and enclosures has been carefully designed to complete the classic bathroom. Each item has been engineered to the highest standard to ensure superb performance and reliability.

1200mm Arched Shower Door

Shower roses are available in sizes from 5" to 12" and for the ultimate showering experience body jets and multi-function heads are also available.

Glass shower doors and panels in a variety of styles and sizes allow you to create a bespoke enclosure

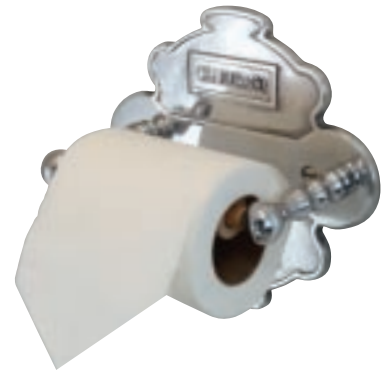

Perfect Cloakroom, the Blenheim High Toilet with Mahogany Throne seat combines with Sussex Small Basin, and Small Blenheim Mirror

TOILETS & CLOAKROOMS

Don't forget the WC

When creating a period bathroom it is easy to overlook the WC. But, once you have the bath, shower and basin in place a traditionally styled toilet will complete your scheme.

Designed to co-ordinate with other items in the range, the Chadder & Co. toilet is available with a low level or high level polished metal or white china cistern.

TAPS

The Finishing Touch

Good quality taps that give years of reliable service are vital in the bathroom and Chadder & Co. have the perfect range designed to work across its collection of baths and basins.

▲BSM 101 Wall Shower Mixer + Backplate

▲BSM 100 Bath Shower Mixer

Featuring a cross head design and authentic white ceramic inserts the range includes basin pillar taps, a three hole basin mixer and attractive bath/shower mixer with classic 'telephone' handset.

▲Our cross head taps left (chrome), right (nickel)
Size 2XXmm x 1XXmm

CHROME OR NICKEL

All Chadder products come in either chrome or nickel... gold plated... There are three main differences between chrome and nickel: authenticity, colour tone, and ageing characteristics.

Nickel has a warm, amber tone while chrome has a colder, blue hue. Both finishes have a durable surface plating and age well. Nickel, however, can develop a slightly cloudy tarnish over time, while chrome is generally tarnish-free.

HEATED RAILS

Everybody loves a warm Bathroom

Everyone enjoys the luxury of wrapping themselves in a warm towel after stepping out of the bath. With this in mind Chadder & Co. offer a choice of heated towel rails which will enhance the bathroom not only with their classic styling but with the generous heat they emit.

▲ Blenheim rail & radiator

▲ Windsor wall mounted rail

▲ Sussex ladder rail

The Blenheim model combines the heat of a radiator with an elegant towel rail.
