fiora TOUCH
YOUR
BATHROOM

feeling **SKIN**

SKIN IS OUR OBSESSION ON WHICH WE THINK, FEEL AND WORK. FIORA IS A COMPANY OFFERING SOLUTIONS FOR THE BATHROOM: SHOWER TRAYS, FURNITURE, RADIATORS AND COMPLEMENTS, WITH A CLEAR COMMITMENT TO SEARCHING FOR NEW CONCEPTS. FIORA IS SINGULARITY

SKIN, our identity.

Our sense is the sense of TOUCH in the broadest sense of the word. We have to touch to be able to feel and we want the objects we use to acquire value through the tactile sensations they give us.

Experimenting with DIVERSITY.

Reality sets a path for us. Nature is diverse. We research and take ideas from it that we later apply to products that offer multiple and diverse solutions.

Enjoying QUALITY.

We research, work and create without ever losing the reference of QUALITY. Whatever their nature, FIORA products always respond to a high level of quality that exceeds the user's expectations.

Creating COMFORT.

All our work must not lose sight of its main goal, which is that its use must improve the everyday life of people. We design to improve life, trying to provide value in each of the objects created.

SILEX Collection

IN FIORA WE ARE ONCE AGAIN EMBRACING INNOVATION AND ORIGINALITY WITHOUT COMPROMISING ON OUR RENOWNED QUALITY. AS PART OF OUR COMMITMENT TO SUCCESS, AND THE DEMAND FOR OUR COLLECTION OF SILEX SHOWER TRAYS.

Today we are unveiling the most recent features of the series designed to provide increased luxury, safety and comfort. However, this collection also includes two new shower trays the objective of which is to enrich and add the finishing touch to the collection.

MADE-TO-MEASURE FRAMES and AVANT. With the same quality and characteristics to which the new features presented below are added.

ADAPTABILITY

THE SHOWER TRAY WHICH FITS ANYWHERE. ONE OF THE MAIN NEW FEATURES OF THE SILEX SHOWER TRAY IS ITS ADAPTABILITY AND FLEXIBILITY TO FIT INTO ANY AMBIENCE.

Whether private homes or in public venues such as sports centres, outdoor or indoor swimming pools, etc. Moreover, two of the trays within the SILEX collection, Extra Flat made-to-measure and Framed made-to-measure, can be personalised thus lending them greater exclusivity and the ability to meet any requirement.

NEW COLLECTION features.

*ANTIBACTERIAL and ANTI-FUNGICIDAL
Hygienic and healthy.*

FIORA HAS STUDIED AND REFORMULATED THE RAW MATERIAL USED IN THE MANUFACTURE OF THE SILEX SHOWER TRAYS, THE SILEXPOL, IN ORDER TO ENSURE THAT IT IS NOW ANTIBACTERIAL AND ANTI-FUNGICIDAL AS WELL.

THROUGH THE APPLICATION OF THIS NANOTECHNOLOGY, WE ARE ABLE TO GUARANTEE THE HIGHEST HYGIENE AND HEALTH LEVELS FOR OUR FEET AND BODY. WE ARE COMMITTED TO RESEARCH IN ORDER TO ACCENTUATE EXCLUSIVITY AND INNOVATION.

*Material with
NANOBATH*

*Material without
NANOBATH*

DESCRIPTION OF NANOBATH TECHNOLOGY

NANOBATH represents innovation and consists in the application of nanotechnology to specific health elements in order to offer the same anti-fungicidal and antibacterial properties as well as hydrophobic properties, i.e., to make them water-repellent.

The objectives pursued by NANOBATH technology are as follows:

- To prevent the appearance of fungal and bacterial cultures (the most typical kinds which appear in bathrooms) in areas which are in contact with water thus providing products with good safety and hygiene levels.*
- Reduction, due to hydrophobic properties, in the appearance in surface stains which can occur after each use.*
- That antibacterial, anti-fungicidal and hydrophobic properties prevail in the element throughout its useful life.*

FIORA BATH COLLECTIONS, S.L. has developed NANOBATH technology which is applied to all its components that come into contact with water. It consists in the application of a layer which includes nanoparticles which reacts with the component by transforming its outside properties whilst ensuring that they remain in the element throughout its useful life.

NANOBATH technology has been tested by performing resistance tests on the attack of fungi and bacteria using an internal method based on the standard ISO 22196:2007 "Measurement of antibacterial activity on plastics and non-porous surfaces" and the Japanese standard JIS Z 2801 "Test for Antimicrobial Activity and Efficacy" by the prestigious Technological Centre CIDEMCO-Tecnalia, a process during which tests were performed using one hundred cultures with different specimens.

NEW COLOURS

14 shades for your tray.

THE SILEX COLLECTION OF SHOWER TRAYS IS, AMONGST OTHER THINGS, CHARACTERISED BY FEATURING A WIDE RANGE OF COLOURS AND FINISHES. SUCH VARIETY HAS THE OBJECTIVE OF PROVIDING MAXIMUM PERSONALISATION IN BATHROOMS.

A LA CARTE COLOURS. It is also possible to personalise colours by selecting them from the RAL CHART with a 20% surcharge to the base price.

STOOLS AND SHELVES New SILEX accessories.

THE SILEX RANGE HAS NOT ONLY BEEN EXPANDED WITH THE ADDITION OF NEW SHOWER TRAYS. THIS TIME WE ARE ALSO PRESENTING TWO NEW ACCESSORIES; STOOLS AND SHELVES WHICH CAN BE COMBINED WITH THE TRAYS AND FURNITURE TOPS.

The stools for the showers and the shelves have been manufactured using fully water-repellent materials and maximum safety is offered due to their anti-slip qualities, as well as the highest level of hygiene thanks to the reformulation of the raw material.

The shelves have standard measurements of 30, 40 and 50 cm and fully made-to-measure both in slate and smooth versions.

POLISHED ALUMINIUM PROFILE

For finishing walls.

THIS IS YET ANOTHER CONSIDERABLE ADVANTAGE WHICH WILL ENHANCE THE BEAUTY OF YOUR BATHROOM.

From now on when you replace your bath with a Silex shower tray you will be able to feast your eyes on a new polished aluminium profile. This material finishes each of the Silex material plates in the walls by offering an undisputed improvement in aesthetics once the tray installation has been completed. Simple solutions which have the ability of turning small details into huge investments in quality and aesthetic value.

FRAMED made-to-measure

NEW VERSION OF THE TRAY FRAMED

Without relinquishing on any of the advantages and characteristics of the framed shower tray, Fiora is launching a new version of the tray; Silex framed made-to-measure. This is a tray which is adapted to any space since it can be personalised in size and shape with the subsequent addition of the frame on the sides deemed opportune.

BOX FIORA

REPLACING your bath with a SILEX SHOWER TRAY

INSTALLING THE SHOWER TRAY

Thanks to the SILEX collection by Fiora, changing your bath for a shower tray no longer needs to be a complicated and expensive process. This is due to the fact that the shower trays feature an original and practical assembly system which covers the wall with plates in the same finish as the shower tray. Finally, and thanks to the new collection, Fiora offers the possibility of including polished aluminium profiling in the tray finish to improve the quality and aesthetics of the arrangement. This simple process ensures that the bathroom does not have to be retiled.

The idea of replacing your bath with the shower tray.

Preparation for the installation

Installation of the SILEX shower tray, with walls finished in the same material.

A new EXTENDABLE BRACKET for the INSTALLATION of the SILEX

THE INSTALLATION OF THE SHOWER TRAY.

Developed based on a system of rails that does not require construction work or

Mounting and installing your Silex shower tray is much quicker and easier. Forget the old concept of construction work and complications when fitting a shower tray. With this new system that is based on the use of rails that are adjustable in both height and size, you will be able to perform the installation with ease, in a quick and safe manner, ensuring perfect stability and the sealing of the assembly.

RAIL ASSEMBLY SYSTEM FOR ANGULAR SHOWER TRAYS

With the aim of providing much more personalised solutions, the SEP model is also available in the version required to install angular shower trays.

X shower tray

mortar

HEIGHT ADJUSTABLE LEGS

This new assembly system has several height adjustable legs that are adaptable to any space.

EXTENDABLE SYSTEM

The assembly system is both extendable in width and in length to provide support for different tray sizes.

WALL/FLOOR ANCHORING

A solid and effective system for anchoring to the wall and/or floor in order to ensure the safety and effectiveness of the installation.

ANTI-LEAK SYSTEM

The system has a system of butyl self-adhesive tape that allows for effective sealing preventing water leaks in addition to contributing to soundproofing.

COMPLIANCE WITH THE DIN 4109 STANDARD

Acoustic insulation in buildings

Our lives are surrounded by sounds: those from outside: the traffic, people, the street; and those from inside our home: children, music, the neighbours. The noise in our daily life may entail health problems, from sleep disorders and mood swings to stress problems.

One of the most requested solutions for defending the peace and tranquillity in the home is acoustic insulation. The companies in the business continue to develop different materials in order to provide their customers with the utmost quality in fulfilling their functions.

Therefore, representing one of the reference brand names in the business entails comprehensive compliance with all the quality requirements. Fiora ensures compliance with the DIN 4109 Standard that refers to “Acoustic insulation in buildings”.

Through this standard there is a control in the reduction of both the air-borne and structural noise that is perceived by the recipient. Good acoustic insulation is intended to minimise the transmitted energy. Therefore the appropriate materials are those that have the property of reflecting or absorbing a significant part of the incident sound wave energy.

Thus, both the material as well as the design and placement of the shower tray by means of the new rail-free assembly system ensure that when the sound waves hit it, a significant part of these are dissipated within it, thus reducing the energy emitted on the other side. This is largely made possible by the large number of support points in the system; many legs with their sound insulating blocks and a cellular rubber profile with a butyl finish.

SPEND YOUR TIME ON WHAT YOU WANT

Advantages derived from a system: eliminate problems and reduce your installation time.

Up until now we have explained the physical and potential qualities of the new bracket assembly. Below, we will discuss three basic aspects of the system, above all, when performing or rectifying an installation; the elimination of the bother of the construction work, the streamlining of the installation process and the rectification of the process in the event of a water leak or a faulty installation.

1

ELIMINATE PROBLEMS FROM THE MORTAR

This new bracket assembly has been designed based on an adaptable rails system and it therefore eliminates all the bother that complicated construction works involve or those from the use of mortar: noise, dirt, water leaks, etc.

2

SPEED UP THE INSTALLATION

As it involves an installation that does not require construction works, we eliminate the time required for setting the mortar, so that the overall installation time of the new assemblies system is largely reduced.

3

IN THE EVENT OF LEAKAGE OR ERROR IT ALLOWS THE INSTALLATION TO BE REDONE

In the event that the installation is not properly performed and it must again, the re-installing of the bracket is far quicker and easier than in other processes.

SILEX DISPLAY

New exhibition elements

SILEX DISPLAY: SEE, TOUCH, UNDERSTAND.
The second Silex support is its display. It is used to highlight the main qualities of the shower tray and the brand name itself. Moreover, this display includes a real physical example of a shower tray in the collection in order to be able to immediately see the incredible quality of the original and real tray.

STANDFLOOR SILEX - MODERN, FUNCTIONAL AND ATTRACTIVE

This modern and effective display stand graphically shows just how convenient, easy and practical it is to make the transition from a bathtub to a shower tray. In addition, it is highly attractive and its dimensions make it adaptable to fit any space. It includes a drawer for the leaflets that provide more information.
