THE BATH MAKERS

bc designs

JULY 2017

“Our focus is on timeless, authentic design that holds its own in the bathroom market. From period reproductions to cutting edge originals, BC Designs has it all.”

A little history

BC Designs is based within the Essex countryside and prides itself on quality, innovation and originality. Started in 1999 by British designer Barrie Cutchie, who has been at the forefront of bathroom innovation and design for over thirty years, BC Designs has become a well respected design house that offers beautifully crafted products in all areas of the bathroom market.

BC Designs' bathroom collections and freestanding baths have been imitated, but never matched, the world over and include unique materials such as Cian® and Acrymite®.

Setting standards

With the new 2017 brochure, BC Designs have widened their range of products to enhance your bathroom even further.

With the introduction of new baths and the excellent Victrion traditional taps and showers they have again set the standard for others to follow. With emphasis on comfort and detail, all products are fully guaranteed to give you complete peace of mind.

Discover your perfect bath

The Malabar Hotel Bathrooms by AquaJade

CLASSIC ROLLTOP

At BC Designs we know and love classic design and materials but also appreciate the value of modern techniques. Each traditional rolltop bath reproduction is crafted with the original in mind but in modern materials for comfort and ease of installation. Bespoke painted colours are hand painted in our workshop to create a finish that is authentic and individual.

The Dial House, Reepham. Bathrooms by MAG Bathrooms

BOAT

Polished Cast Aluminium Bath

The classic Boat bath cast in solid marine grade aluminium and bonded with an acrylic liner for maximum heat retention. Beautifully finished to reproduce the 'reclaimed bath' look of authenticity but much lighter than cast iron alternatives.

Specifications

Material	Bonded Acrylic Liner/ Cast Aluminium Outer
Height	710mm*
Length	1640mm*
Width	685mm*
Capacity	150 ltrs
Dry Weight	110 Kg
Finish	Polished Aluminium
Mounting Type	Floor
Overflow Hole	51mm Ø
Waste	Not Included

Important

- 1) When a trap is fitted to this bath, it will protrude below the floor level. Therefore, a small floor recess will have to be made to allow for that.
- 2) There is a mouse hole at the rear of the plinth for waste pipe exit and overflow as standard. If the waste pipe work exits under floor, we can supply with just a hole for the overflow pipe. If required please state when ordering.
- 3) The provenance of this product is reproducing the "reclaimed" look of authenticity. The outer is hand polished. There will be small pin holes, dimples and colour variations due to that process, and these should be viewed in this light.

Note

* All dimensions are approximate due to manufacturing tolerances.

Make it your colour

CAST IN CIAN®

THE FINEST SOLID
SURFACE MATERIAL

Our exclusive Cian® material is a first in its class and is manufactured from the highest quality raw materials. It is highly durable, stain resistant, non-porous, scratch resistant and retains heat for the perfect long soak. Due to its unique properties it allows BC Designs to create classic as well as cutting edge shapes that feel wonderful to bathe in.

Bathroom design by TEC Lifestyle

BAMPTON

Inspired by the early 20th century fire clay baths, Bampton is made from our unique Cian® material for better durability and heat-retention. It has a very large bathing area, due to the thin rim achieved in this single casting, yet is a space saver at only 1555mm long. Available in a white polished finish.

Plinth:

Material	GRP
Height	80mm

Basin:

Material	Cian® Solid Surface
Height	163mm
Length	615mm
Width	360mm
Finish	Gloss White

Important

- 1) There is a limited void under this bath, therefore the trap and waste will need to be installed under floor level. If this is not possible there is a separate plinth available to raise the level of the bath. Please order at the same time as ordering the bath as the plinth will need to be individually matched in our workshop.
- 2) This bath has an overflow built into the side.
- 3) It is therefore **not** possible to fit an overflow filler to this bath.

TASSE

The oval Tasse bath's delicately simple design is coupled with a generous bathing area and all the properties of BC Designs' exclusive Cian® material.

The Tasse bath comes with a push down waste in chrome.

A traditional slipper bath brought up to date with sweeping lines and smooth construction.

£ 1,082.50 *Exc. VAT*

£ 1,299.00 *Inc. VAT*

Code BAS035

Specifications

Material	Acrymite® Acrylic
Height	800mm
Length	1590mm
Width	675mm
Capacity	195 ltrs
Dry Weight	35 Kg
Finish	Gloss White
Mounting Type	Floor
Waste	Included

Important

- 1) The Slipp has limited space under the bath, therefore the waste outlet will always have to go beneath the floor. Please check when ordering.
- 2) This bath does not have an overflow.
- 3) It is therefore **not** possible to fit an overflow filler to this bath.

CHALICE MAJOR

The spacious Chalice Major bath is the ideal bath for a long, luxurious soak. It has a built in tap ledge for your chosen brassware and is made from seamless acrylic.

The Chalice Major comes with a push down waste in chrome.

£ 1,249.17 *Exc. VAT*
£ 1,499.00 *Inc. VAT*

Code BAS015

Compatible overflow filler

We can add an overflow filler to this bath for you

£ 195.00 *Exc. VAT*
£ 234.00 *Inc. VAT*

Code WAS305

Specifications

Material	Acrymite® Acrylic
Height	560mm
Length	1780mm
Width	935mm
Capacity	270 ltrs
Dry Weight	40 Kg
Finish	Gloss White
Mounting Type	Floor
Waste	Included

Important

- 1) When a trap is fitted to this bath, it will protrude below the floor level. Therefore, a small floor recess will have to be made under the bath to allow for that.
- 2) If it is necessary to bring waste pipe work out above the floor please seek advice from BC Designs prior to installation.
- 3) This bath is supplied with a factory fitted push down waste in Chrome.

Bathroom Design by Ripples

CHALICE MINOR

Chalice Major's younger brother, without tap ledge, is an oval bath with sweeping lines. It is crafted using the Acrymite® seamless system for a luxurious one-piece look.

The Chalice Minor comes with a push down waste in chrome.

£ 1,082.50 *Exc. VAT*
£ 1,299 *Inc. VAT*

Code BAS016

Specifications

Material	Acrymite® Acrylic
Height	590mm
Length	1650mm
Width	900mm
Capacity	240 ltrs
Dry Weight	38 Kg
Finish	Gloss White
Mounting Type	Floor
Waste	Included

Important

- 1) There is sufficient void under this bath to accommodate a low level trap and waste pipe work.
- 2) If it is necessary to bring waste pipe work out above floor please seek advice from BC Designs prior to installation.
- 3) Due to limited access between inner and outer, this bath is supplied with a factory fitted push down waste in Chrome.
- 4) It is therefore **not** possible to fit an overflow filler to this bath.

VIADO

The simplicity of the Viado bath makes it a firm favourite and it is now available in three sizes.

The Viado comes with a push down waste in chrome.

We recommend Farrow & Ball or Little Greene Paint Co. Exterior Eggshell finish. See page 50.

Note

Each piece of stone or marble is hand cut, finished and polished to bring out its natural beauty. Due to the nature of this product, each countertop is unique and there will be variations from piece to piece. Colour and texture variations, such as blemishes, marks and pits are part of the character of natural stone and are not a sign of a lesser quality product.

Add a splash of
COLOUR

For those who like something a little bit different we also offer a bath painting service on our traditional Excelsior and Boat baths, and now, some Stands.

We methodically key the bath or stand, prime and then paint in your chosen shade in our dedicated workshop to order.

We recommend Little Greene Paint Company and Farrow & Ball colours in an exterior eggshell finish, however, if you would like to choose your own paint or RAL colour to match your scheme then please give us a call to check if it's suitable.

Please allow 14 working days for delivery of your painted bath or stand.

Note

Full colour swatches can be ordered directly from the Farrow & Ball or Little Greene Paint Company websites. RAL colours also available.

OUR SHOWERS

The BC Designs Victrion Shower valves are not just good looking! Our twin, triple and dual control shower valves are manufactured in the UK by a dedicated team. By installing one of our shower valves, you can enjoy the following benefits:

Industry certified

Our concealed twin, triple and dual control shower valves are TMV approved. All Thermostatic valves are WRAS Approved.

TMV2

TMV2 approval means the shower will maintain the preset temperatures even if the water pressure varies when other appliances are used, preventing domestic hot water scalding.

TMV3

TMV3 approval means that the shower meets Government health & safety requirements for use in public places such as schools, hospitals etc. Together, they ensure that our showers offer peace of mind and safe showering for all the family.

Safety for all the family

- Thermostatic control to +/- 2 degrees even if the temperature or incoming pressures fluctuate
- Full thermal protection to prevent scalding even in the event of hot or cold water failure
- In the event of hot or cold water failure, the valve will shut down the water supply

Reliability

See website for exact flow rates of individual valves.

- Accurate flow control
- Excellent flow rates – even at low pressure. Victrion showers can deliver 5.5 litres of water per minute at 0.1 bar pressure
- The patented thermostatic cartridge is highly resistant to calcium build-up – even in hard water areas

Ease of installation

BC Designs Victrion Thermostatic Shower Valves contain a patented cartridge – which makes them simple to install and easy to maintain after installation.

- The cartridge is fully reversible, meaning if hot and cold supplies are the wrong way round, it doesn't need re-plumbing. Simply remove the cartridge, turn 180° and replace.

Guarantee

Victrion shower valves come with a 10 Year Guarantee. Visit our website for Terms and conditions.

www.bcdesigns.co.uk

SAFE LIGHTING GUIDE

This guide is designed to help you in selecting safe lighting for your bathroom, shower or sauna. In fact any area inside the home that may potentially come into contact with water.

To find out more, please study the lighting zone guide opposite.

THE ZONE SYSTEM

For the purposes of safe lighting, the bathroom or shower area is divided into ZONES. The zones are numbered according to the distance away from a source of water.

Zone 0 (IP68 submersible to 9 metres)
The ultimate in watertight fittings. Suitable for saunas, steam rooms or to be mounted underwater (down to 9 metres).

Zone 1 (IP65 jetproof)
Should be fitted where the fitting may be subjected to a jet of water, for example from a shower handset.

Zone 2 (IP44 splashproof)
Should be fitted wherever the fitting may be splashed. Anywhere within 0.6 mtrs of a basin or similar water source.

Other Areas For all other areas where jets or splashes of water will not occur.

The information presented is intended as a simple guide only. BC Designs takes no responsibility for incorrectly installed luminaires. Any final decisions about installation should be taken by a Part P qualified electrician.

BS 7621:2008 Requirements for electrical installations, IEE wiring regulations 17th edition was published in January this year. Installations designed after the 30th June 2008 are to comply with BS 7671:2008

Visit www.theiet.org for more information

IMPORTANT INFORMATION

Terms of Trading

BC Designs will not normally sell directly to the consumer, for this reason our published terms and conditions relate to the supply of goods to retail outlets. Therefore terms and conditions applicable to the end user are also those offered by the outlet from where you purchase the item and may vary. For this reason end users should always refer any issue to the point of purchase in the first instance.

Guarantee and Warranty

We offer a 2 year guarantee against manufacturing faults on all lighting products and wastes in this brochure. This may be enhanced by warranties offered by the manufacturer, however it is important that you follow the manufacturers instructions in registering for any such benefits. We offer a 10 year guarantee against manufacturing faults on our unique range of baths and non electrical products. In either instance all products must be fitted in accordance with both the instructions and any relevant regulations in the jurisdiction in which they are fitted, and they are supplied for normal domestic use only.

We do not cover products against fair wear and tear, misuse, incorrect usage, incorrect installation, incorrect specification, malicious or accidental damage, negligence or lack of servicing. In all case guarantees and warranties are not transferable. Proof of purchase will be required to validate any claim. No claim greater than the purchase price paid to BC Designs or for consequential loss will be entertained by BC Designs, except where negligence on the part of BC Designs is proven.

Printing Accuracy

Prices are for guidance and are correct at the time of going to print, but do not constitute a formal offer as prices may have to change due to unforeseen circumstances. Accordingly all prices are those ruling at the date of despatch. Photographs in this brochure are studio posed in a setting intended to demonstrate the ambiance and look of the main product featured, unless otherwise stated. All items used to dress the shot are photographers props and therefore we are unable to advise on them.

Availability

We aim to maintain stock of all items in this brochure at all times. However, the majority of items contained herein are produced in small volume and in specialist circumstances and can therefore be affected by significant lead times. Availability should be checked at the time of ordering and before making any commitment to installation.

Measurements and Specs

All measurements are given for guidance only. Variation may occur either due to manufacturing tolerances, specification change, error or admission. We reserve the right to change specifications at any time.

For this reason it is recommended to check critical dimensions with BC Designs prior to ordering. BC Designs will not accept any liability where there is no prior written advice of critical requirements.

Returning Goods

Items which are unsuitable or not required may be returned subject to the following conditions:-

- 1) BC Designs must be contacted prior to any item being returned and return documentation obtained. BC Designs will not accept any responsibility where this requirement has not been complied with.
- 2) The original BC Designs invoice number must be quoted when contacting BC Designs. BC Designs will only deal with the persons to whom the product was originally invoiced.
- 3) The item to be returned must be in perfect re-saleable condition when received at BC Designs. We will not accept any items for return which has been fitted, used or is in a condition other than that which it was supplied.
- 4) The retail packaging must be unmarked and in good condition. For this reason it is wise to retain all packaging materials and to open packaging with care.
- 5) It is not the responsibility of BC Designs to organise or pay for the return of goods in these circumstances.

6) In selecting a suitable method for return consideration should be given to proper insurance as BC Designs cannot accept liability for goods damaged in transit.

7) Responsibility for packaging the item in a suitably robust fashion lies with the sender. If there is any doubt as to what a suitably robust fashion means please contact BC Designs for specific packaging advice.

8) Items damaged in transit will not be accepted for refund/credit.

Claims After Installation

No claims will be entertained other than for a genuine manufacturing fault after installation has commenced. Visible marks, scratches, impact damage, discolouration through chemical contamination, etc will not be accepted as genuine manufacturing faults.

Therefore all products should be carefully inspected for visible damage prior to installation. Proper care should then be taken to protect the product from damage during installation and through to commissioning.

Authenticity

It is in the nature of some items in this brochure that they are made using techniques rarely in common use today. This is to recreate an authentic period look. This should not be confused with mass produced featureless product and thus construed as imperfect. Where applicable this is highlighted in our information on individual products.

Delivery

We use third party carriers and offer a basic two day service for all deliveries.

With the exception of overseas and outlying areas, all deliveries within Mainland Britain which are at a value higher than £125 net and to a commercial address for delivery between 9am and 5:00pm will be delivered FOC.

Deliveries to private addresses and those requiring additional service in excess of those described above will incur additional charges. Please contact our Sales Office with your requirements of a quote.

Orders for less than £125 net will incur a carriage charge of £8.95.

Damage in Transit

We do not use our own transport. Therefore there is a limited time in which we can make a claim for any damage in transit against carriers. For this reason outer packaging should be inspected for obvious signs of damage before accepting delivery, and regardless all items should be opened and inspected within 3 days of receipt. We cannot accept claims for damage in transit after this, nor will we accept any responsibility once goods have been passed to a third party without prior inspection. It is the responsibility of the Showroom to inspect the goods BEFORE they deliver to a customer.

Inspection

All products supplied by BC Designs are carefully inspected prior to shipping, and every care is taken over packaging and carriage to ensure they arrive in good condition. However, sometimes things can go wrong, so for that reason it is important that proper care is taken on receipt to inspect the outer packaging for damage before signing for the item in good order. In any case, the package should be opened and the contents inspected within 3 days of receipt, as no claims for damage in transit can be entertained after that time.

No item should be passed to a third party without first ensuring it is in good order by thorough inspection. BC Designs will not accept any claim for damage outside of the 3 day window, and most especially if goods have also been transferred to the care of a third party without inspection.

Your rights

Any agreement between BC Designs and the Customer shall be subject to and governed by the domestic Law of England. No agreement between BC Designs and the Customer can be deemed to be binding howsoever proposed or made in the event that such agreement is found to conflict with English Law.

Full Terms and Conditions of supply are available on request.

INFORMATION

GRANITE WORKTOPS

Each piece of stone or marble is hand cut, finished and polished to bring out its natural beauty.

Due to the nature of this product, each countertop is unique and there will be variations from piece to piece. Imperfections, such as blemishes, marks and pits are part of the character of natural stone and are not a sign of a lesser quality product. Immense pressure has formed this material over millions of years and there will be metallic deposits of quartz, felspar, silica and mica which may show in the surface of the worktop.

Each countertop is carefully sealed and waterproofed for bathroom use. You must reseal your granite countertop regularly... At least on a twice yearly basis, or when water seems to be soaking into the surface.

Maintenance

- For regular cleaning and maintenance, you should clean your granite countertop at least once a week with soapy water.
- Clean up liquid spills promptly to avoid any surface damage. Some liquids, such as alcohol and medication have high acid contents so can damage granite surface if left for any length of time

• Examples of products that must be cleaned up promptly include:

- Nail Polish Remover
- Toilet Cleaner
- Shampoo
- Drain Cleaner
- Perfume & Cologne
- Toothpaste
- Shaving cream or foam
- Hair colouring products

- Check the chemical content of your cleaning products to make sure they do not contain abrasives or lacquer removing materials.
- Use coasters under drinking glasses to avoid leaving unwanted surface marks.
- DO NOT stand on granite worktops or place very heavy items on top. Place protective pads under weighty objects such as ceramics or appliances.
- DO NOT place hot items on your granite surface.

In the interest of product improvement, BC Designs reserves the right to make changes to dimensions and materials at any time. Please check the website for updates before ordering.
