THE JACUZZI® BATHROOM COLLECTION

For over thirty years Jacuzzi® has been the name at the heart of many of the world's most glamorous bathrooms. Initially it was our whirlpool baths – the world's first – which captured everyone's imagination. Now the collection has grown to include soaking baths, sanitaryware, baths, shower enclosures and over bath screens as well as stylish brassware. The Jacuzzi® Bathroom Collection – styling that will thrill you and a level of quality that will reassure you.

## WELCOME TO THE JACUZZI® BATHROOM COLLECTION

▲  
Your bathroom doesn't just have to be a functional space it should be a place of relaxation, contemplation and if planned carefully, a place to lift your spirits and elevate your sense of wellbeing. Our philosophy has always been about rising above the ordinary bathroom to create something extraordinary that you'll simply fall in love with.

From high performance whirlpool baths, shower enclosures and bathroom suites, you'll find Jacuzzi® bathroom products offer the highest levels of performance and quality at the leading edge of bathroom design. Simply visit your nearest Jacuzzi® Retail Specialist, who will be happy to help you to design your bathroom and assist with the practicalities.

We hope you enjoy this brochure and that it provides the inspiration to enable you to create your dream bathroom.

## SHOWERING

Jacuzzi® UK has led the way in shower enclosures for over 18 years and to this day we continue to lead on quality and style. With options available for recess, corner, freestanding and wet room installations and a range of contemporary styles, there is a showering option to suit any situation.

All our Jacuzzi® enclosures benefit from the features listed below:

- ▲ Jacuzzi® Clearglass coating for ease of cleaning and a brighter finish
- ▲ Concealed fixings for a contemporary streamlined appearance and improved hygiene
- ▲ A minimum enclosure height of 185cm to enable people of all heights to shower in comfort and ensure maximum water retention
- ▲ Seals and gaskets are treated with a mould inhibitor to aid hygiene and facilitate cleaning

### HOW A GENUINE JACUZZI® WHIRLPOOL BATH WORKS ITS MAGIC

Lie back and you'll instantly feel the unmistakably high flow rates of the Jacuzzi® jets. Warm flowing 'fingers' massaging gently yet deeply, soothing and relaxing those areas that need it most. Here's what's actually happening:

The warm, pulsating Jacuzzi® jets cause blood vessels in the skin and underlying tissues to dilate. The increased blood flow allows cells to take in more oxygen and nutrition while removing more waste substances. At the same time, surface pores are opened to cleanse the skin of impurities. As a result of this action tired muscles are relaxed and restored, circulation is improved, the feeling of stiffness in joints is reduced and skin gets better tone, giving an outward glow of vitality.

## WHIRLPOOL BATHS

Created over 30 years ago, the Jacuzzi® whirlpool system it is still the original, both in quality and performance of its hydromassage experience and the sheer cachet of its brand name. All Jacuzzi whirlpool baths are engineered in Italy to the highest Jacuzzi brand standards and carry the distinctive Italian styling.

All Jacuzzi® Whirlpool baths benefit from the features below:

- ▲ Jets positioned to target the main muscle groups on the body
- ▲ Jets circulate large volumes of water at low pressure for a powerful massage and outstanding performance
- ▲ Fully adjustable jets allow personalisation of your massage to target your preferred body area
- ▲ Rigid pipe work ensures that the bath drains completely to prevent standing water
- ▲ Baths are wet tested in our factory to ensure they arrive in perfect working order
- ▲ The base is supported by a steel chassis for strength and rigidity, with adjustable feet to combat uneven floors
- ▲ An automatic switch off system activates after 20 minutes to allow you to forget about time and enjoy your hydromassage
- ▲ Sanitising solution is available for all our baths as an optional extra
- ▲ A luxury headrest is included as standard for greater comfort

## THERMOSTATIC MIXER VALVES

Once you have chosen your brassware give yourself peace of mind with the addition of a thermostatic mixing valve. Designed to fit your bath or basin, the valve will ensure that hot water is delivered at a temperature that will not scald, particularly important when used by the very young or elderly.
