## WATER SAVINGS

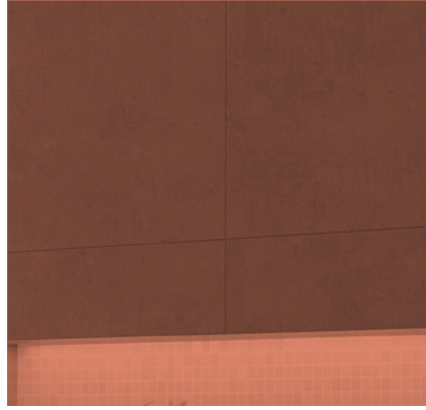

In order to reduce water consumption in your home, our toilet cisterns are equipped with dual flush mechanisms, which control the amount of water required for flushing. Options include 3/6L or 4,5/3L, the latter is offered with the most recent cisterns.

# SANITARY WARE

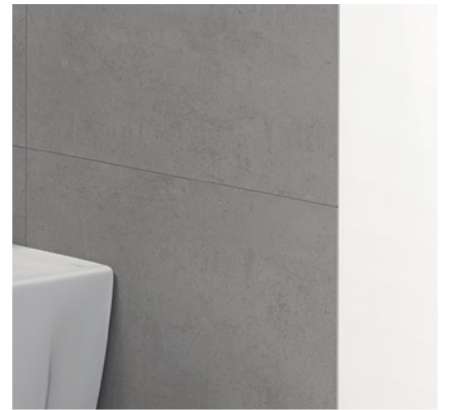

**PERFORMANCE**

Our range of toilet seats&covers equipped with a soft-close mechanism keeps on growing, with specific models for both toilets and bidets. The special hinges which are used allows the seat to fall slowly, making them last longer as well as providing greater security.

**DESIGN**

Our sanitary ware collections have been designed to ensure maximum quality, comfort and security. Their styles are not only visually pleasing, but also exceptionally functional, with a great focus on providing sustainable solutions.

## TYPES OF SEWAGE OUTLETS

### DUAL OUTLET

The toilet is equipped with a technical flush, which makes it possible to adjust the trap to make the flushing towards the floor - vertical outlet - or wall - horizontal outlet.

### HORIZONTAL OUTLET

The toilet allows flushing in the direction of the wall - horizontal outlet.

### VERTICAL OUTLET

The toilet allows flushing in the direction of the floor - vertical outlet.

## FUNCTIONALITY

For use in public and/or private bathrooms, Sanitana's range of urinals has been designed with the aim of combining functionality with an attractive design.

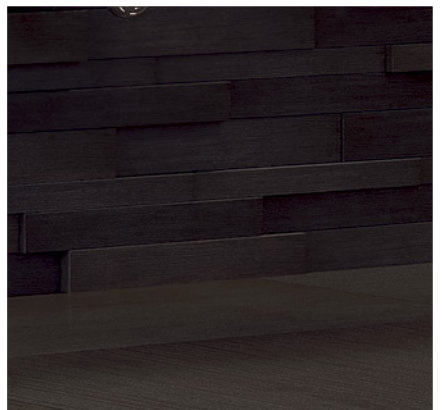

# URINALS

**PERFORMANCE**

Our urinals allow different types of applications, giving them additional flexibility when it comes to fitting. Their distinct shapes and the different models designs provide an ample choice when deciding which urinal will be the best fit for your bathroom.

# WASHBASINS

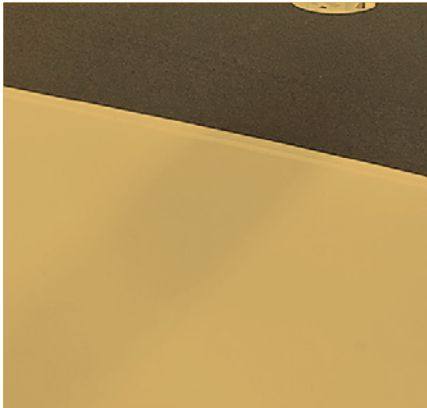

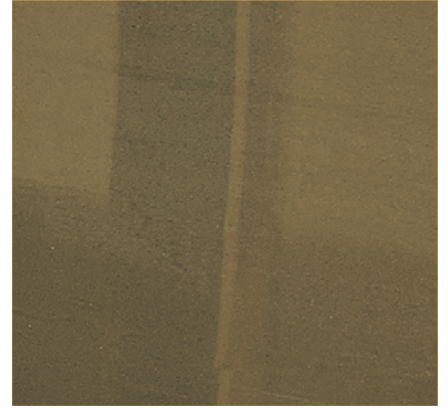

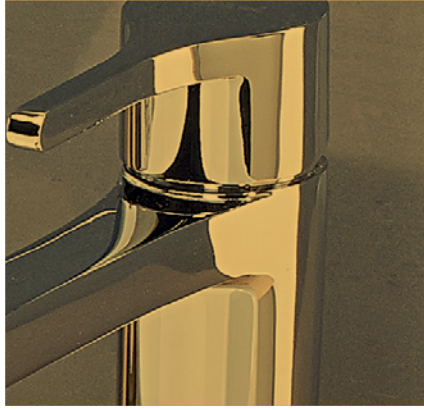

## EFFICIENCY

Our washbasins stand out for their generous sizes, both in depth as well as general size, ensuring that the water does not splash onto other surfaces and making your washing experience not only more pleasant but also more efficient.

## DIVERSITY

With fully and semi-recessed models, countertop, wall-mounted (with or without pedestal or siphon cover) and vanity models - with or without tap holes - Sanitana washbasins offer a wide variety of styles, formats and measurements in a vast range of solutions designed specifically with you in mind.

## STYLE

Experiment with contemporary shapes. Discover a vast range of washbasins and choose a style, format and size which meet your personal taste. From more traditional approaches to modernist solutions, you will definitely find what you are looking for.

#### WHAT IS SOLID SURFACE?

Solid surface is a composite material comprising of a hybrid polyester resin with alumina fillers. Solid surface is non-porous, non-toxic and capable of resisting aggressive chemical agents. It is also a homogeneous material, which maintains its original look. A standout feature is its high rigidity and durability, while allowing easy manufacture using manual and CNC methods traditionally used in carpentry. It is this ability that allows the creation of more complex products with larger sizes than is possible in the production of ceramic sanitary ware.

#### SOLID SURFACE'S 4 MYTHS

##### IS IT HARD TO CLEAN?

No, it is **simple**: just use soap or an all purpose cleaner and a sponge and scrub the surface in a circular motion to restore it to its original condition. With **attested sanitary qualities**, the compact and non-porous surface of our solid surface does not allow bacteria or fungi to grow or spread. It was designed specifically for a **maintenance without worries**.

##### DOES IT GET SCRATCHED EASILY?

Solid surface is an **extremely durable material**. Nevertheless, like any item of everyday use, the normal wear and tear may involve a few scratches. In the case of solid surface, however, **most repairs are simple and quick**. Furthermore, in order to minimize the perception of any wear the SMOOTH washbasins provide a matte finish, which minimizes the visibility of small surface imperfections.

##### DOES IT STAIN?

No, solid surface is **stain resistant**. It is a homogeneous material with a remarkable stability when exposed to ultraviolet (UV) rays or artificial light, remaining unchanged. Thanks to its non-porous surface **any dirt**, even the most ingrained, **can be removed**, making it easier to maintain your bathroom space.

##### IS IT HIGHLY FLAMMABLE?

Solid surface is a non-toxic surface **highly resistant to heat and fire**. It is also able to withstand extreme environments such as areas near the sea, areas exposed to humidity or temperatures below zero. Nevertheless, as with all materials, it is advisable to minimize its direct exposure to heat, in order to protect the surface of the washbasin.

**1 SMOOTH**

**MOUNTING TYPE:** Recessed / Vanity

**ECOLOGY**

Why use the maximum flow of water when half of it is enough? Our ecological cartridges, through their ceramic discs, condition the opening of the handle to 2 modes: around 50% of water flow when half open and 100% when fully open.

# MIXERS & TAPS

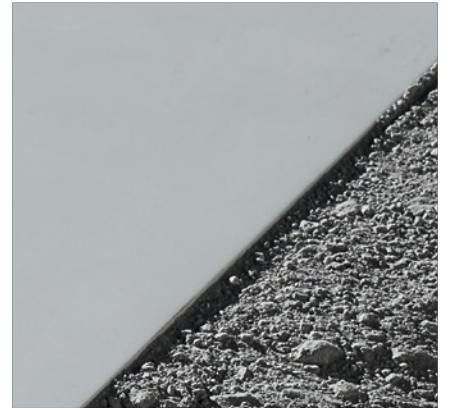

**5-YEARS WARRANTY**

Because it is vital to be able to trust the products we use at home, we are committed to ensuring the quality of all our products. For this reason we provide a 5 year warranty on all taps we sell.

**EFFICIENCY**

Our concern with performance also involves water temperature control and energy expenditure. Thermostatic mixers were thought-out to control and limit the temperature of the water, giving you added comfort and security.

# FURNITURE

**SUSTAINABILITY**

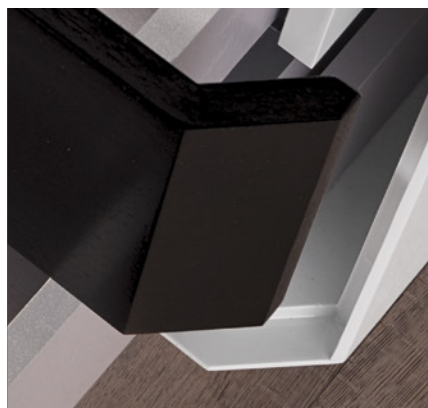

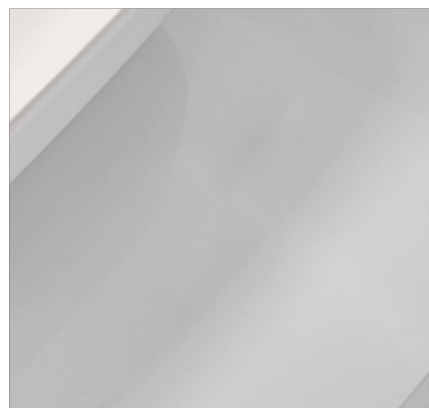

The environmental impact of industrial development is an overwhelming concern for organizations all over the world. We are fully aware of our responsibility and, as such, we search for sustainable materials and manufacturing processes when developing our furniture ranges.

**QUALITY**

When manufacturing our furniture we use plywood, MDF and particle board, due to their physical qualities and the adaptability to the functional requirements of bathroom furniture. Our concern for quality also extends to fittings, hinges and slides which come from top european manufacturers in the industry.

**FINISHES**

The finishes used in our furniture include lacquering and the use of melamine and laminates. They give strength and durability to furniture, facilitate their cleaning and conservation, and allow a great versatility of colors and textures made possible by these finishes.

**STYLE AND EFFICIENCY**

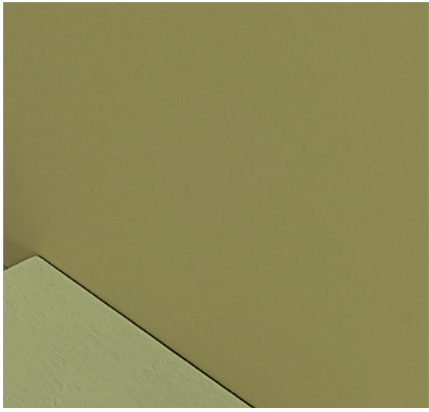

In the hectic life we lead, a shower is the easiest and most practical way of bathing. But it doesn't have to be with less style or pleasure. In fact, it is just the opposite. The combination of a shower tray and enclosure is the simplest way of creating a pleasant bathing area, to enjoy to the fullest.

# SHOWER TRAYS

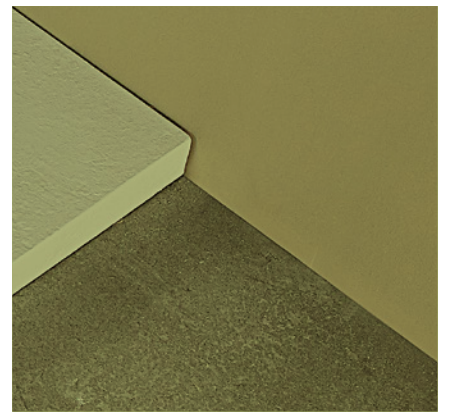

**DIVERSITY**

Different formats and a wide range of sizes are available in our portfolio. From trays as small as 700mm x 700mm to 2000mm x 900mm (ideal when converting bathrooms which used to have bathtubs) you'll easily find exactly what you need to match your personal taste.

**MATERIALS**

Our shower trays are produced with: acrylic sheets which are then shaped and strengthened with glass fiber to impart resistance; enamelled steel sheets; ceramics; and the new composite material STONEX®. In short: range without neglecting the performance of each product.

**FEATURES:**

In Stonex®

Textured surface with an anti-slip effect

Extra-flat shower tray: ideal for application of Sanitana shower enclosures

Siphoned Ø90 shower waste with stainless steel cover included

## STONEX®

Stonex® is a composite material made of polyester resin combined with mineral charges and a gel coat surface with 500µ (microns). With an even colour and textured anti-slip surface - for maximum comfort and safety - the ROCKS shower trays are resistant to wear, impact, thermal fluctuations, discoloration from UV rays, as well as aggression from chemical agents.

#### 32 MEASUREMENTS, 90° ANGLES

With 29 large format sizes (2000 to 900mm length) and 90° degree angles, ROCKS shower trays are the ideal replacement for a bathtub, significantly easing the installation process.

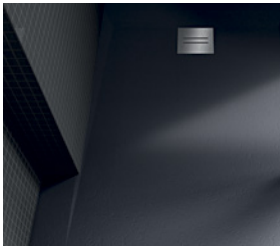

#### FLAT SHOWER TRAY

With a 30mm flat surface and the ability to be installed flush with the floor, ROCKS shower trays combine perfectly with SANITANA shower enclosures.

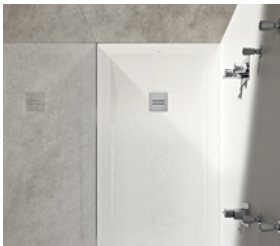

#### TEXTURED FINISH

With a textured finish similar to the feel of natural stone, ROCKS shower trays ensure maximum comfort and safety with their anti-slip surface. They are available in: White (10C), Anthracite (59G) and Black (15A).

#### ADAPTS TO YOUR SPACE

With the possibility of a cut-to-size at the work site and an afterwards finish on all of its sides, makes ROCKS shower trays truly adaptable to your bathroom space.

#### CENTRED SHOWER WASTE

Even with a cut-to-size at the work site, the ROCKS's outlet waste remains centred on its longitudinal axis, making its installation easy and effortless.

#### STAINLESS STEEL SHOWER WASTE

Equipped with an Ø90mm outlet waste with a stainless steel (AISI 304) cover, capable of draining 0,6 liters of water per second, it ensures not only comfort, but also the durability of the materials.

**BEAUTY AND FUNCTION**

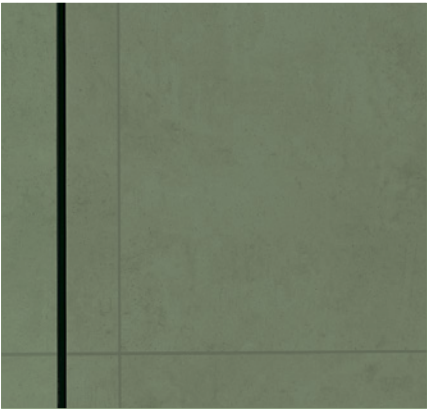

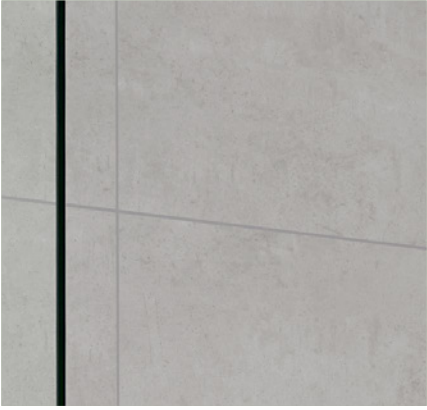

With a contemporary and functional design, Sanitana's enclosures reflect current aesthetic values, minimizing the use of profiles. They are practical and versatile solutions which comply and follow the highest standards of quality.

# ENCLOSURES

**VERSATILITY**

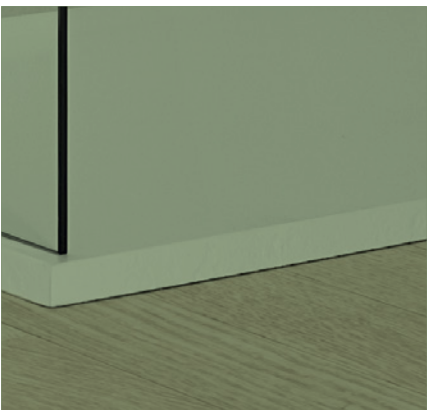

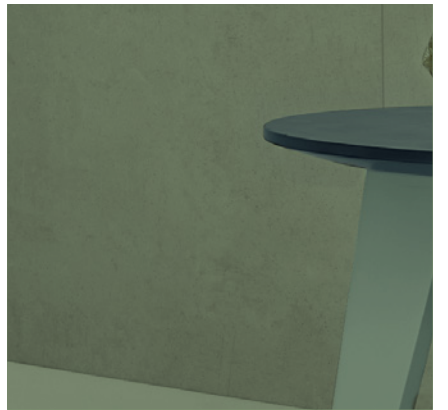

The sizes and formats of our enclosures have been designed to ensure maximum compatibility with all our shower trays and bathtubs. To do so we have introduced compensation profiles into our models which allow adjustments to be made when fitting your enclosure or bath screen.

**QUALITY**

We invest continually and significantly in quality control so that we can create even better products. Investment is made in materials but also in the features of each model, including not only the use of tempered safety glass but also the practical sliding doors or lower tabs systems.

**WELL-BEING**

Comfort, versatility and functionality do not have to be mutually exclusive. With our hydro massage shower columns, you can have all this and more. Extremely practical, they easily fit into smaller spaces, transforming any bathroom into an authentic oasis of well-being.

# COLUMNS

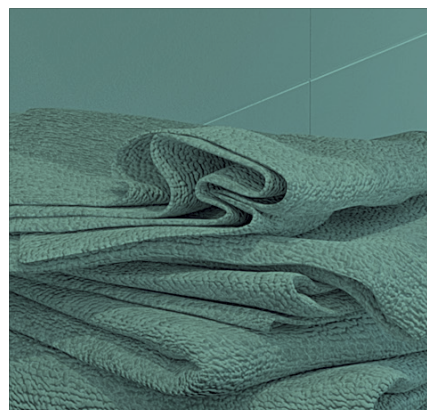

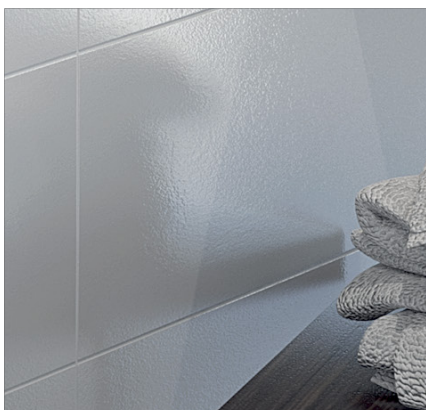

**QUALITY**

In materials and functions. Whether with nebulizing jets which create a similar atmosphere to a turkish bath, or pulsating jets which provide an intense massage. Enjoy large overhead showers, cascade shower spouts and even thermostatic mixers which accurately control water temperature.

**ADVANTAGES**

Hydro massage and shower columns are a versatile and functional solution for your bathroom. They can even be fitted even in smaller spaces and deal efficiently with all your day-to-day needs. Give your bathroom an up to date and contemporary look.

## REFUGE OF WELL-BEING

Now you can enjoy the ultimate experience of well-being in the comfort of your own bathroom. Modern and elegant, our bathtubs stand out for their comfort and functionality, providing you with a place to evade and relax.

# BATHTUBS

## HIDRO MASSAGE

Discover the benefits and power your whirlpool hydro massage which, through its different types of jets, allow you to maximize water's ability to relax and tone your muscles, adapting it to your specific needs in an all round experience of wellness.

## WARRANTY

All our bathtubs come with a 3-year warranty for their components.

## QUALITY

We invest continually and significantly in quality control. Without exception, all our bathtubs are submitted to strict testing, which guarantees electrical safety and sound operation, allowing us to comply with European Community standards and be certified by accredited institutions.

## HYDRO MASSAGE PROGRAMS

The 4 hydro massage programmes – anti-stress, toning, sports and beauty – allow you to adapt the relaxing and toning power of water to your specific needs. They are available in the **Jet Set Star** and **Jet Set Star Dorsal** systems.

CUBIC	222	PATRICIA	231	STONE	239
MOOD	224	HELENA	232	TREVO	240
QUATTRO	225	ROSARIO	233	OASIS	241
PLAZA	226	CAROLINA	234	ÁREA	242

NEX	229	MARGARIDA	236	RUTE	244
RAQUEL	230	CLAUDIA	238	ISABEL	245

### ANTI-STRESS 15M

With average strength, it is ideal for relaxing at the end of long day of mental and physical exertion.

### TONING 10M

With progressive intensity, this programme is recommended as preparation for an active day.

### SPORTS 20M

With a strong energetic action, this programme was designed for after sports use, relaxing your muscles.

### BEAUTY 20M

Deep hydro massage with an anti-cellulite effect, improves the texture and smoothness of your skin.

## TOUCH REMOTE CONTROL

Our programmable whirlpool systems - **JET SET STAR** - are controlled through a practical waterproof remote. Its large touchscreen screen lets you control in a simple and practical way all the functions of your bathtub.

### TOTAL CONTROL

Through this practical touch remote control you can control, in a simple and convenient way, all whirlpool functions of your bathtub.

### WIDE TOUCHSCREEN

A screen size of generous proportions with a backlit screen, so you can fully enjoy the capabilities of your bathtub.

### SIMPLE AND PRACTICAL

Thanks to a group of illustrative icons of the different options, you will easily learn how to control all the functions of your bathtub.

### 100% WATERPROOF

Because it makes no sense to worry as you relax, your remote control is perfectly waterproof and can be submerged without any damage.

**A NEW EXPERIENCE**

In a perfect symbiosis between style and functionality, our cabins associate the power of new technologies with a meticulous and elegant design. The result is a new shower experience which makes comfort a part of your day-to-day life.

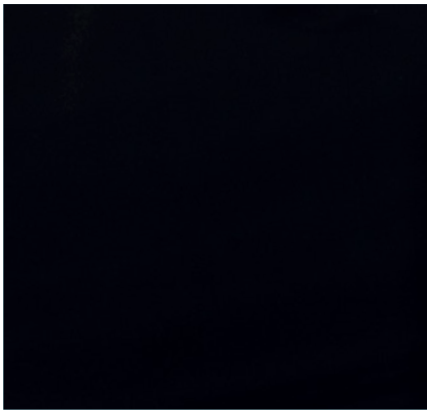

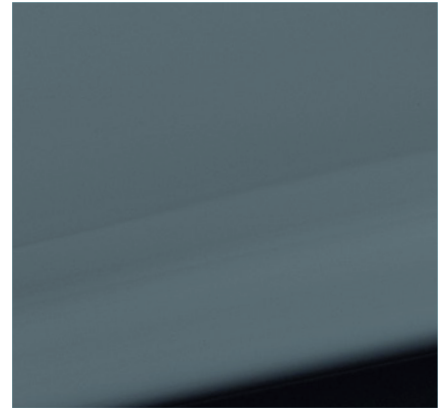

# CABINS

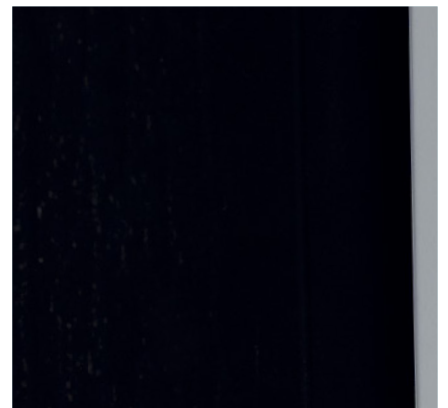

## HYDRO SAUNA

The hydro massage shower cabins equipped with a hydro sauna system use the inexhaustible revitalizing power of water steam, a precious ally for your well-being. Creating a warm and humid environment, a gentle mist of steam involves the body, relaxing the muscles and getting rid of toxins.

## HYDRO MASSAGE

All our hydro massage shower cabins offer a full-body massage and/or a localized massage, using adjustable jets placed at strategic points such as lower neck, lumbar, back, thighs and/or calves.

# MODELS AND INFORMATION

HYDRO MASSAGE SHOWER CABINS / PROGRAMS AND THERAPIES

## EXPERIENCE OF WELL-BEING

All our cabins offer full-body massage and/or localized massage, using adjustable jets placed at strategic points such as lower neck, lumbar, dorsal, thighs and/or calves. Cabins equipped with the hydro sauna system use the endless revitalizing power of steam, known since early times as a pillar of well-being. Creating a warm and humid atmosphere, they produce a smooth cloud of vapour which wraps around the entire body, relaxing your muscles and expelling toxins.

## HYDRO MASSAGE PROGRAMMES

The 5 hydro massage programmes – anti-stress, toning, sports, beauty and relaxation – allow you to adapt the relaxing and toning power of water to your specific needs.

### ANTI-STRESS 15M

Average strength, it is ideal for unwinding at the end of long day of mental and physical exertion.

### TONING 10M

With progressive intensity, this programme is recommended in preparation for an active long day.

### BEAUTY 20M

Deep hydro massage with an anti-cellulite effect. Improves the texture and smoothness of your skin.

### RELAXATION 27M

Associating a massage to the benefits of a steam bath, it gives the ultimate wellness experience.

### SPORTS 20M

With a strong action, this programme was designed for an after sports use, relaxing your muscles.

## THERAPIES

### STEAM BATH

The steam bath or 'turkish bath' has a warm and humid atmosphere. The steam causes you to sweat which cleans out the pores and your skin, eliminating toxins. It is good for respiratory problems and combats liquid retention and dry skin as it promotes lymphatic drainage and the oxygenation of blood.

**SMART** Wellness / **LUX** Wellness

### LYMPHATIC MASSAGE

Lymphatic drainage massage is a therapeutic technique which optimizes and facilitates lymph circulation, promoting blood flow, relaxed muscles and elasticity of the skin through the use of progressive and continuous high-intensity jets. Good for cardiovascular related problems.

**LUX** Wellness

### CHROMOTHERAPY

Chromotherapy is an ancient therapy used in the treatment of a number of diseases through simultaneous use of light and colour. Stimulating and regenerative, chromotherapy promotes a physical and mental balance.

**SMART** Wellness / **LUX** Tech / **LUX** Wellness

### AROMATHERAPY

Aromatherapy consists of the vapour diffusion of fragrances with therapeutic properties. The essential oils are assimilated into the blood flow and are an important aid in the treatment and prevention of several physical and psychological problems.

**SMART** Wellness / **LUX** Wellness

### SCOTTISH SHOWER

A scottish shower consists of massage by high-pressure jets of water with temperatures varying from hot to cold. Among the benefits it offers are stimulation of blood circulation and relaxed muscles. It also helps combat insomnia and produces an incomparable feeling of well-being.

**ULTRASTYL**

Ultrastyl is a revolutionary material which combines acrylic resins and silica. Characterized by its durability and smoothness to the touch, the possibilities offered allowed us to create sinks with large working areas and models ranging from more traditional designs to modern and contemporary lines.

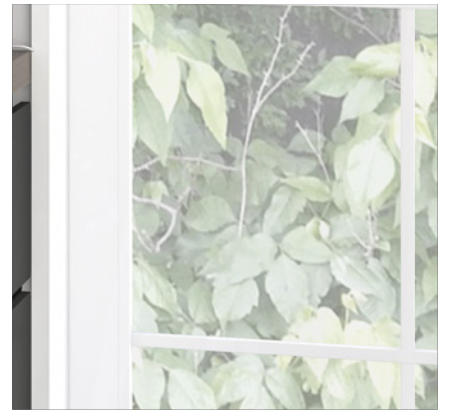

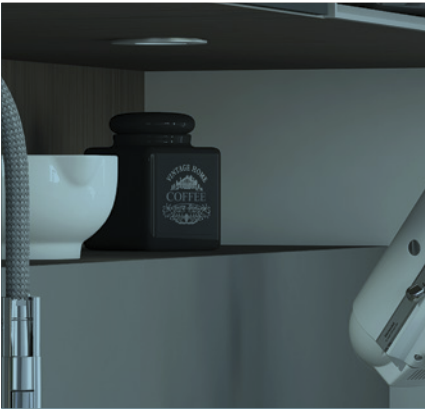

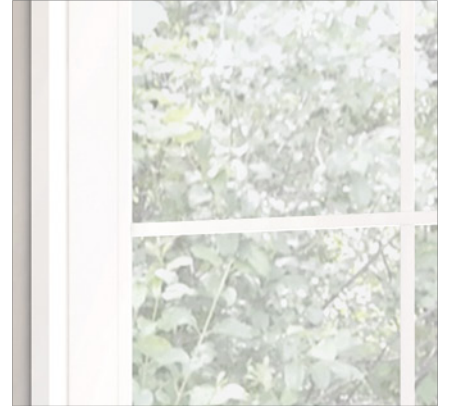

# KITCHEN

**STYLE AND EFFICIENCY**

Our sinks are designed to blend style and modernity with efficiency and sustainability. They are produced in Ultrastyl, a revolutionary material which combines acrylic resins and silica. Discover the potential of this amazing material and our range of products in the next pages.

**SINK MIXERS**

Our sink mixers are equipped with normal ceramic cartridges or ecological cartridges and, in some cases, 2-function pull-out shower hoses. They are available in a variety of styles and have been designed to provide maximum comfort.

### + CERAMIC Cartridges

Essential components in any tap, cartridges are the water-tight cylindrical mechanisms which fit into the body of a tap. They consist of 2 discs: 1 fixed and 1 moving. Water flow and temperature are regulated by the position of the moving disc which is altered when you turn the tap head. Sanitana fits all taps with ceramic discs as they are longer-lasting and more resistant, making your tap more efficient and durable.

### + ECOLOGICAL Ceramic cartridges

Why use maximum flow when half will do? Our ecological cartridges, through their ceramic discs, provide dual opening options: around 50% of water flow when half open and 100% when fully open. The slight resistance you feel when you lift the lever is a sign that you are activating the ecological system and saving water.
